

WEEK 5

Development & Iteration

PROJECT THEME

From Passion to Product: Creating AI Agents with Microsoft AI

Week 5 of a 6-week
build

This Week's Objective

With your architecture diagram and proof of concept complete, shift into **active development**. Build on top of **last week's Proof of Concept (PoC)** — expand its core features, integrate Microsoft AI services, and iterate toward a **functional, demo-ready solution**.

Things to Note

Build on your PoC Expand your prototype — add core features and integrate Microsoft AI services.

Azure for Students (free) Free Azure / Microsoft Foundry subscription — [Azure for Students](#)

Copilot Studio account (free) Free account to build your agent — [aka.ms/TryCopilotStudio](#)

Commit often to GitHub Push your progress regularly to the GitHub repo so your work is versioned and backed up.

Deliverable This Week

Enhanced Build

Your PoC expanded — core features working and closer to a functional solution
